EDUCATION

CIET, Coimbatore Institute of Engineering and Technology, Coimbatore
B.Tech - Artificial Intelligence and Data Science - CGPA - 7.67

2025-Present
Coimbatore, Tamilnadu

PROJECTS

Voice Assistant(PYTHON) | SpeechRecognition, pyttsx3, pyaudio, NLP DEC 2024

- Developed a voice assistant application utilizing Python with libraries such as SpeechRecognition, pyttsx3, and NLTK to process and respond to user commands. Integrated natural language processing (NLP) for task automation, including web searches, weather updates, and system controls.
- Enhanced user experience with voice feedback and command execution in real-time.

Malware Analysis and Detection | Securescan IOS app, Jan 2025

- Conducted comprehensive analysis and detection of spyware and keylogger malware in iOS applications using tools like Xcode, Frida, and Hopper. Applied reverse-engineering skills to uncover and mitigate security risks in iOS environments.
- Leveraged static and dynamic analysis techniques to identify malicious behavior and vulnerabilities.
- Developed detection mechanisms to prevent unauthorized access and protect user data.
- After this app found the malware file it will be quarantined to the respective file.

Sign Language recognition(python) | opencv, mediapipe, tensorflow, pytorch, kerasNLP DEC-2024

- Developed a sign language recognition system using Python and libraries like OpenCV, MediaPipe, and TensorFlow.
- Implemented real-time hand gesture detection and classification to recognize American Sign Language (ASL) gestures.
- Utilized machine learning models to accurately translate hand movements into text or speech. Enhanced the system with user-friendly interfaces for seamless interaction.

TECHNICAL SKILLS

Programming Languages: Python, C, Java, SQL

NLP and Computervision : NLTK, Spacy, OpenCV, Tensorflow

Data Analysis and Visualization Tools Matplotlib, Seaborn, PowerBI, Tableau, Ms.Excel

Skills: CyberSecurity, MachineLearning, DataStructures And Algorithms, ArtificialIntelligence, DataScience

CERTIFICATIONS

- Python - HackerRank
- Data Structures And Algorithms - Simplilearn
- Data Visualization Analytics Internship- Forage

Profile Summary

- Machine Learning Engineer focusing on Computer Vision and Natural Language Processing, with hands-on experience developing deep learning models using PyTorch and TensorFlow. Skilled in implementing state-of-the-art architectures including Transformers, CNNs, and LSTMs for real-world applications. Passionate about combining theoretical ML knowledge with practical engineering solutions to build models that scale.
